```

```
-----  
<None>
```

```
User profiles
```

```
-----  
All User Profile      : CYBERCLASS_LAB1
```

Comando netsh wlan show profiles name = (nombre-wifi)

- Se utiliza para listar todos los perfiles de red inalámbricos registrados en este equipo.

```
C:\Windows\System32>netsh wlan show profile name = CYBERCLASS_LAB1

Profile CYBERCLASS_LAB1 on interface Wi-Fi:
=====

Applied: All User Profile

Profile information
-----
Version                : 1
Type                   : Wireless LAN
Name                   : CYBERCLASS_LAB1
Control options        :
    Connection mode    : Connect automatically
    Network broadcast  : Connect only if this network is broadcasting
    AutoSwitch         : Do not switch to other networks
    MAC Randomization  : Disabled

Connectivity settings
-----
Number of SSIDs        : 1
SSID name              : "CYBERCLASS_LAB1"
Network type           : Infrastructure
Radio type             : [ Any Radio Type ]
Vendor extension        : Not present

Security settings
-----
Authentication         : WPA3-Personal
Cipher                 : GCMP-256
Authentication         : WPA3-Personal
Cipher                 : GCMP
Authentication         : WPA3-Personal
Cipher                 : CCMP
Authentication         : WPA2-Personal
Cipher                 : GCMP
Authentication         : WPA2-Personal
```

Comando netsh wlan show profiles name = (nombre-wifi) key=clear

- Se utiliza para ver la informacion detallada del perfil de red seleccionado, incluyendo la contraseña.

```
C:\Windows\System32>netsh wlan show profile name = CYBERCLASS_LAB1 key=clear
